Overview

Effective January 1, 2014, under the Affordable Care Act (ACA), states were given the opportunity to set up and monitor a presumptive eligibility process for certain Medicaid groups.

Hospital participation was optional.

Overview of Benefits of HPE

- HPE provides eligible patients with immediate access to Medicaid.
- HPE ensures the hospital will be reimbursed for covered services, and in a timely manner.
- HPE provides additional opportunities for patients to get connected to ongoing Medicaid coverage.

Overview

Virginia made the decision that qualified hospitals could immediately approve certain individuals for Medicaid without waiting for an eligibility determination from the local department of social services (LDSS) or Cover Virginia.

This process is referred to as Hospital Presumptive Eligibility (HPE).

Hospital Guidelines

- Qualified hospitals must be an approved Virginia Medicaid provider;
- Qualified hospitals must complete, sign, and submit the Virginia Qualified Entity Agreement for Hospital Presumptive Eligibility; and
- Only direct hospital employees who participated (or completed the training slides) in DMAS training can make HPE determinations.
- A person from a third party entity or not an employee of the hospital can determine an HPE individual.

HPE Qualified Entity Agreement

- Provides the identifying hospital information and the point of contact for the hospital;
- Specifies the terms, requirements, and responsibilities as a qualified hospital;
- Provides potential for corrective action measures if needed; and
- Requires the hospital authorized agent's signature for agreement with the terms of participation.

HPE Performance Standards

Initial performance benchmarks:

- 85% of the HPE determinations would result in the submission of a full Medicaid application for continued coverage; and
- At least 70% of HPE determinations would result in individuals being determined eligible for Medicaid based on submission of a full application.

HPE Performance Standards

- If performance standards are not met:
 - *A 60-day action plan will be implemented during which DMAS will work with the hospital to meet standards;*
 - *Additional trainings may be provided to improve performance;*
- DMAS may terminate the hospital's authority to perform HPE determinations if performance standards are not improved; and
- A hospital's determination of HPE cannot be appealed.

HPE Performance Standards

A hospital's participation with DMAS or any Medicaid Managed Care Organizations (MCOs) will not be impacted based on participation with HPE or HPE performance standards.

HPE provides full Medicaid benefit coverage for

Hospital Presumptive Eligibility

What is Hospital Presumptive Eligibility (HPE)?

Certain hospitals are able to enroll eligible individuals in a limited short-term Medicaid coverage through HPE. This is a temporary coverage program.

Who qualifies for HPE?

This temporary coverage is based on financial and other factors for the following coverage groups:

- An individual aged 19-64 who is not on Medicare and meets income limits
 - Note: Individuals with Medicare may still qualify for Medicaid through other options.
- A parent or caretaker relative of a child or children in the home under age 18, or 19 if the child is still in school
- A pregnant person
- A child under age 19
- A former foster care individual under 26 who was in foster care at the time of their 18th birthday
- A person diagnosed with breast or cervical cancer
- A person eligible for limited Medicaid benefit for family planning coverage only

Pregnant individuals can only get HPE coverage one time during their **pregnancy**. All other individuals can only get HPE coverage one time per **year**.

What are the income limits?

Qualifying for HPE depends on household income and family size. For your family size, count the number of people included on your federal taxes. If you don't file taxes, count how many children and stepchildren under age 19 live in your home.

If you are pregnant, include the number of unborn children in your family size. Household income is based on what the individual reports as monthly income. Monthly income is based on the gross income (before taxes and deductions) of all members included in the family size. Income limits depend on the covered group you qualify for.
